

tp bennett is an equal opportunities employer.

We will endeavour to select candidates for interview for this role using anonymised CVs. Please send your CV to careers@tpbennett.com. The tp bennett HR Department will remove names, and references to age, gender and non-relevant points of geography (etc), before passing CVs on to recruiting personnel.

Job Title: Sustainable Designer / Sustainability Coordinator

Departments: Sustainability – supporting the Architecture & Interior Design studios

Location: London, with home/ flexible working opportunities

Job purpose

You will provide sustainable and healthy design solutions across the practice's varied and exciting architecture, interior design and master planning divisions. You will passionately and persuasively champion sustainability on projects throughout all RIBA Stages, and will support clients and colleagues in defining and delivering best practicable sustainability and wellbeing outcomes.

You will help develop tp bennett's sustainability strategy and actively deliver our company targets which are set in accordance with both the United Nations Sustainable Development Goals and our ISO14001:2015 Environmental Management System.

This challenging and varied multi-disciplinary role will be an exciting career move for someone with a passion for environmental design and social value, and who wants to make a positive impact on the built environment sector. You will be working with the Head of Sustainability and the tp bennett Sustainability Focus Group, supporting studios of dedicated architects and interior designers, on UK and international projects across a wide range of sectors. You will get the chance to do your own sustainability research and to present your innovative ideas to design team members and clients.

Key responsibilities & accountabilities

- Support the development of tp bennett's Sustainability Strategy
- Assist in producing client strategies and information for bids and tenders
- Liaise with clients and design teams to develop and implement project sustainability and wellbeing briefs.
- Provide colleagues and project teams practical and feasible advice and solutions across the triple-bottom-line of sustainability.
- Research and implement equitable and inclusive design mechanisms.
- Achieve sustainable design outcomes to set time and budget constraints.
- Advise design teams on certifications such as BREEAM, LEED, WELL and fitwel, and help colleagues prepare the evidence needed to meet assessment criteria.
- Communicate sustainability matters at all levels across the practice, deliver training and upskill colleagues.
- Research new suppliers, techniques, materials and innovations to achieve sustainable and healthy design and build.
- Helping maintain a database of sustainable and healthy products and suppliers.
- Help develop and sell the tp bennett sustainability brand externally.

Qualifications, experience & skills

The ideal candidate will have many of the following:

- You have a degree related to either engineering, architecture/ interior design or sustainability/ environmental science.
- You will have experience of built environment sustainable design, ideally in both the commercial and residential sectors
- You will understand how to install sustainability throughout the RIBA Stages
- With time you will feel confident to independently run the sustainability and wellbeing aspects of projects and to interact productively and positively with clients and design teams.
- You will be confident in making a case for sustainability and in interfacing with colleagues and clients in doing so.
- You will have knowledge of UK Environmental Legislation, Building Regulations and ISO 14001 Environmental Management Systems.
- You will have knowledge of BREEAM, LEED, WELL and fitwel certifications, with qualifications preferable.
- You will have knowledge of Net Zero Carbon and the Science-based Targets Initiative.
- You will have knowledge of the United Nations Sustainable Development Goals.
- You will have knowledge of sustainable and healthy materials across their whole lifecycle.
- You will have an understanding of environmental science (e.g. carbon and water cycles and the prevention of impacts to air, water and land)
- You will have an understanding of social sustainability, including of supply chains and measurable social value .
- You will have the ability and desire to remain ahead of sustainability trends and advancements, and to share this growing knowledge throughout tp bennett.
- Competency in Revit, InDesign and AutoCAD is preferable.
