

Invitation to sustainably-focused suppliers of architecture & design products:

tp bennett has created a web-based platform - AD Lib (our architecture & design library) - to make it easier for designers to access and compare product sustainability data

BUILDING A SUSTAINABLE FUTURE

UNDERSTANDING HOW OUR BUILDINGS IMPACT PEOPLE
THROUGHOUT OUR SUPPLY CHAINS

- **Suppliers:** we would love you to upload your product information to AD Lib! Please scan the QR code and sign-up (accepting cookies)
- You can upload data for as many products as you like (note the **yellow 'duplicate' button** to make it easier to add similar products)
- Please answer all the applicable questions in numerical order for the product(s) to show up in our database.
- At the moment this database is for tp bennett only; however it is our ambition to share this as an open-source resource for our sector
