

Job Title:	Senior Interior Designer
Department:	Interiors
Location:	London (hybrid)
Reporting to:	Associate Director / Project Director

Job Purpose:

tp bennett is seeking a talented, motivated, and experienced Senior Interior Designer to join one of our established Interior Design Studios. This is an exciting opportunity for an ambitious designer to further develop their career within a successful, collaborative, and design-led practice, working on high-quality corporate fit-out projects.

Key responsibilities and accountabilities:

- Support Project Directors and Directors in the delivery of interior design projects, with a strong focus on corporate and workplace fit-outs.
- Take responsibility for running projects from concept through to delivery, ensuring design excellence and technical accuracy.
- Manage and nurture client relationships, including presenting design concepts and managing expectations throughout the project lifecycle.
- Meet and liaise with clients to assess project requirements, budgets, costs, and technical specifications.
- Prepare high-quality technical and 3D drawings, including CAD layouts, Revit models, and visualisations.
- Produce presentation materials, including mood boards, sample boards, and client-facing design presentations.
- Select finishes, materials, and FF&E in line with project briefs, budgets, and sustainability considerations.
- Coordinate with consultant teams to support design development and technical coordination.

- Manage and mentor Junior Interior Designers, supporting their development and ensuring project deliverables are met.
- Assist with cost management and budget planning alongside the wider project team.
- Undertake other ad-hoc duties as required to support the business and project delivery.

Qualifications, experience, and skills:

- Degree-qualified in Interior Design or a related discipline.
- Proven experience in workplace and corporate interior design.
- A strong and well-presented portfolio demonstrating conceptual, technical, and delivery skills.
- Ability to communicate design ideas clearly, including three-dimensional thinking and spatial awareness.
- Intermediate-level experience using Revit is essential.
- Strong proficiency in AutoCAD, Adobe InDesign, Photoshop, and Illustrator.
- Ability to sketch by hand is desirable.
- Excellent conceptual design, detailing, and presentation skills.
- Strong verbal and written communication skills.
- Highly organised with the ability to multitask, prioritise workloads, and meet deadlines.
- A collaborative team player with a proactive and positive approach.
- Flexible and adaptable, with a willingness to travel or work extended hours when required to meet project deadlines.
